

Generic Injectables Pipeline (at December 31, 2007)

Local Market Value of \$14 Billion for Small-molecule Compounds

21 pre-dossier molecules

Filed dossiers for 22 molecules

- Estimated total LMV* of the small-molecule compounds filed and awaiting approval is approximately \$8 billion
- In total, there are 43 molecules in the product pipeline, including biogenerics

*LMV (local market value) refers to the annual sales of equivalent products already being sold in the market, whether patented or generic. LMV is not a forecast of Hospira's expected sales revenue.
